HEATING & COOLING

Though the **Barn** is heated and cooled, during periods of extreme temperature (less than 32°F or greater than 90°F) it can sometimes be difficult to maintain the desired temperature in the **Barn**. Since the **Barn** is a huge open space with multiple doors, it is important to have realistic expectations about heating and cooling the **Barn**. During the set up period of any event many vendors/family members, etc. will be unloading items and bringing them into the **Barn**. Just like in your home, when the doors are opened frequently or left ajar for extended periods, the heating or cooling becomes less effective in that space. To help alleviate this possible problem, it is advisable to use just one or two doors (of the 7 outside doors) for entry into the **Barn** and to close them as soon as practical afterwards.
